UX RESEARCH / GROUP PROJECT

User Persona

A clear snapshot of our primary user, their needs, and design opportunities.

HYPOTHESIS PERSONA • 01

MK

Mohit Karthikeyan

The careful, mobile-first decision maker

PRIMARY USER

AT A GLANCE

AGE	21
ROLE	College student
LOCATION	Urban / semi-urban India
DEVICE	Android smartphone

PERSONALITY

Practical · Curious · Cautious

Illustrative profile. Replace assumptions with real interview findings when available.

IN THEIR WORDS

> “I want to compare my options quickly and feel sure I’m making a smart choice.”

— Mohit Karthikeyan, representative user statement

GOALS & MOTIVATIONS

What Mohit Karthikeyan is trying to achieve

01 **Save time**
Complete tasks without unnecessary steps.

02 **Make informed choices**
Compare details before committing.

03 **Feel in control**
Understand costs, risks, and next actions.

BEHAVIORS & CONTEXT

How Mohit Karthikeyan typically approaches a task

Discovery	Search engines, reviews, peer advice
Decision style	Compares 2–3 options first
Usage pattern	Short mobile sessions between tasks
Trust signals	Transparent details and credible reviews

DECISION JOURNEY

The moments that shape Mohit Karthikeyan’s experience

01 **Discover** — Find relevant options
02 **Compare** — Check details side by side
03 **Validate** — Look for trust signals
04 **Decide** — Choose with confidence

FRUSTRATIONS

What creates doubt or friction

- ! Too many steps or confusing navigation
- ! Missing details, hidden costs, or unclear terms
- ! Hard to tell which information is trustworthy
- ! Cluttered screens or slow mobile pages

NEEDS & EXPECTATIONS

What the experience must provide

- **Clarity** — Plain language and visible next steps
- **Efficiency** — Fast search and useful comparisons
- **Confidence** — Trust cues and transparent information
- **Accessibility** — Readable text and clear feedback

DESIGN OPPORTUNITIES

Turn the research into product decisions

- **Simplify** — Make the primary action obvious.
- **Compare** — Show key differences side by side.
- **Build trust** — Explain verification, costs, and reviews.
- **Guide** — Use helpful empty, loading, and error states.

DESIGN PRINCIPLE — Help users make confident decisions with less effort.

RESEARCH STATUS: HYPOTHESIS — VALIDATE WITH USERS
